3880	problem	Adam	Offsite	Rice	Several problems with this board. we will try to debug it with Greg, but Mike thinks it should be sent to Rice. Misha reported that ALCT scan fails on all channels with this board, and CLCT scan fails on some channels. Mike also noticed that the clock LED is not lighting up. All crate-tests passed, so Mike replaced the LED. It still does not light up.	Rice	0	CCB0038	-1	Crate Clock Board	18-JUL-07
